INDEX

Page

Acidic fractions of crucifer roots, relation to clubroot. Frederick G. Smith, Karl Paul Link, and J. C. Walker 193-204
Acids, fractionation methods, effect on fungicidal activity of turnip 198-199
Air temperature, effect on predisposition of tomato to fusarium wilt 170-172
Alfalfa, inoculation with *Rhizoctonia solani*. 293, 298-301
ALLARD, H. A.: Photoperiodic Behavior of Maryland Mammoth Tobacco under Localization Treatments and in Grafts with Connecticut Broadleaf 15-31
Andropogon scoparius, seed source, effect on growth, adaptation, and use in revegetation 133-142
Ash, white, response to fertilizers and lime in concrete frames 116, 120-122, 126-130
Asparagus—
  breeding for improved strains 65-75
  parental plants, selection and testing 65-76
  plants—
    progeny tests. T. M. Currence 65-76
    ratio of pistillate to staminate 70-72
  progenies, sex ratios from combinations of parental plants 70
  spear size, obtaining 72-73

BARTEL, ARTHUR T.: Some Physiological Characteristics of Four Varieties of Spring Wheat Presumably Differing in Drought Resistance 97-112
Basidiospores—
  dissemination of rhizoctonia foliage blight of sugar beets 305-310
  isolation from *Pellicularia filamentosa* 304
Bean—
  beetle, Mexican, poisoning by yam bean 60-64
  inoculation with *Rhizoctonia solani* 293, 298-301
  lima, vines, lignin content, apparent digestibility by sheep. R. E. Davis, C. O. Miller, and I. L. Lindahl 285-288
  yam—
    chemical composition, analyses 56-63
    fluorescence, measurements 57-58
    insecticidal properties and chemical composition, variations. Roy Hansberry, Robert T. Clausen, and L. B. Norton 55-64
    insecticidal tests 60
    oil and resin, extraction and separation by chemical methods 56-60
    toxicity to Mexican bean beetle 60-64
Beans, hard seeds in, inheritance. G. A. Lebedeff 205-215
BENEDICT, H. M., and ERICKSON, LOUIS C.: Origin of the Seed Coats in Guayule 329-335
Beta vulgaris. *See* Sugar beets.
Bluestem grass, little, seed sources, effect on growth, adaptation, and use in revegetation seedings. Donald R. Cornelius 133-143
Brassica spp., fungicidal constituents, resistance to clubroot disease 194
BRENER, W. H., RIKER, A. J., GRUENHAGEN, R. H., and ROTH, L. F.: Some Chemical Treatments and Their Influence on Damping-off, Weed Control, and Winter Injury of Red Pine Seedlings 87-95
Bromegrass, inoculation with *Rhizoctonia solani* 293, 298-301

Calomel, effectiveness in red pine nursery soil 90-93
Carya illinoensis. *See* Pecan.

Page

Chicken—
  embryo cells, type variations 218-237
  embryos—
    lymphomatosis 217-238
    peripheral circulation under normal and experimental conditions, relation between age, number, and types of cells. R. A. Fennell 217-239
Circulation, peripheral, of chicken embryos, relation between age, number, and types of cells under normal and experimental conditions. R. A. Fennell 217-239
CLAGGETT, CARL O., TOTTINGHAM, W. E., NAGY, RUDOLPH, ROSS, A. FRANK, and MAREK, JERRY W.: Blackening Indices of Potatoes Grown under Various Conditions of Field Culture ..... [145-164
CLAUSEN, ROBERT T., HANSBERRY, ROY, and NORTON, L. B.: Variations in the Chemical Composition and Insecticidal Properties of the Yam Bean (*Pachyrrhizus*) 55-64
Clubroot of crucifers, relations to acidic and phenolic fractions of roots. Frederick G. Smith, Karl Paul Link, and J. C. Walker 193-204
Colletotrichum circinans, germination and growth, effect of conifer root extraction 194-195
CORNELIUS, DONALD R.: The Effect of Source of Little Bluestem Grass Seed on Growth, Adaptation, and Use in Revegetation Seedings 133-143
Cotton seed, yield, effect of skips in field experiments. O. A. Pope 1-13
Crucifer—
  extracts, phenol analysis, PT method 200-201
  roots, acidic and phenolic fractions in relation to clubroot. Frederick G. Smith, Karl Paul Link, and J. C. Walker 193-204
Crucifers—
  fungicidal—
    activity, effect of extraction and fractionation methods 198-199
    constituents, resistance to clubroot 193-204
  susceptibility to *Plasmodiophora brassicae* 194
Cucumis melo. *See* Muskmelon.
CURRENCE, T. M.: Progeny Tests of Asparagus Plants 65-76

Damping-off, red pine seedlings, control 87-95
DAVIS, R. E., MILLER, C. O., and LINDAHL, I. L.: Apparent Digestibility by Sheep of Lignin in Pea and Lima-Bean Vines 285-288
Day length—
  effect on predisposition of tomatoes to fusarium wilt 174, 182
  response of tobacco 15-30
Drought resistance of spring wheat varieties, physiological characteristics correlated with. Arthur T. Bartel 97-112

Embryology of pecan. J. W. McKay 263-283
Embryos, chicken, peripheral circulation, relation between age, number, and types of cells under normal and experimental conditions. R. A. Fennell 217-239
Environment, effect on predisposition of tomato to fusarium wilt 165-184
ERICKSON, LOUIS C., and BENEDICT, H. M.: Origin of the Seed Coats in Guayule 329-335

FENNELL, R. A.: The Relation between Age, Number, and Types of Cells in the Peripheral Circulation of Chicken Embryos under Normal and Experimental Conditions 217-239

Fertilizer, effects on hybrid poplar and other forest tree species in concrete soil frames. Herbert A. Lunt ... 113-132
Flax—
breeding for resistance to rust ... 245-258
hybrids, linkage factors in rust inheritance ... 242-261
inheritance of reaction to rust. H. H. Flor ... 241-262
rust, reaction to, inheritance. H. H. Flor. 241-262
FLOR, H. H.: Inheritance of Reaction to Rust in Flax ... 241-262
Foliage blight, rhizoctonia. *See* Rhizoctonia foliage blight; and under host.
Forest tree species, response to fertilizer and lime treatment in concrete soil frames. Herbert A. Lunt ... 113-132
FOSTER, R. E., and WALKER, J. C.: Predisposition of Tomato to Fusarium Wilt ... 165-185
Fusarium oxysporum f. lycopersici, cause of fusarium wilt of tomato ... 165
Fusarium wilt, predisposition of tomato to. R. E. Foster and J. C. Walker ... 165-185

Gossypium spp., seed, yield, effect of skips in field experiments ... 1-13
Great Plains, range revegetation ... 133-142
GROBER, SAMUEL, and HOPP, HENRY: Effect of Site on Growth of Shipmast Locust ... 315-328
GRUENHAGEN, R. H., RIKER, A. J. ROTH, L. F., and BRENER, W. H.: Some Chemical Treatments and Their Influence on Damping-off, Weed Control, and Winter Injury of Red Pine Seedlings ... 87-95
Guayule seed—
anatomy ... 330-334
coats, origin. Louis C. Erickson and H. M. Benedict ... 329-335

HANSBERRY, ROY, CLAUSEN, ROBERT T., and NORTON, L. B.: Variations in the Chemical Composition and Insecticidal Properties of the Yam Bean (*Pachyrrhizus*). 55-64
Hemicelluloses, quantitative estimation by direct isolation. H. D. Weihe and Max Phillips ... 77-95
HOPP, HENRY, and GROBER, SAMUEL: Effect of Site on Growth of Shipmast Locust. 315-328
Hydrogen-ion concentration, effect on predisposition of tomatoes to fusarium wilt .. 179-181, 182

Indole-3-butyric acid, effect on transplanted pecan trees. C. L. Smith ... 187-192
Inheritance of—
hard seeds in beans. G. A. Lebedeff ... 205-215
reaction to rust in flax. H. H. Flor ... 241-262
Insecticidal properties, yam bean (*Pachyrrhizus*), variations. Roy Hansberry, Robert T. Clausen, and L. B. Norton ... 55-64

KOTILA, JOHN E.: Rhizoctonia Foliage Blight of Sugar Beets ... 289-314

LEBEDEFF, G. A.: Studies on the Inheritance of Hard Seeds in Beans ... 205-215
Light intensity, effect on predisposition of tomatoes to fusarium wilt ... 174-176, 182
Lignin in pea and lima-bean vines, apparent digestibility by sheep. R. E. Davis, C. O. Miller, and I. L. Lindahl ... 285-288
Lime, effects on hybrid poplar and other forest tree species in concrete soil frames. Herbert A. Lunt ... 113-132
LINDAHL, I. L., DAVIS, R. E., and MILLER, C. O.: Apparent Digestibility by Sheep of Lignin in Pea and Lima-Bean Vines ... 285-288
LINK, KARL PAUL, SMITH, FREDERICK G., and WALKER, J. C.: Acidic and Phenolic Fractions of Crucifer Roots in Relation to Clubroot ... 193-204
Linkage, factors in flax rust inheritance ... 242-262
Linum usitatissimum. *See* Flax.

Locust—
black, growth, comparison with shipmast locust ... 324-326
shipmast, growth, effect of site. Henry Hopp and Samuel Grober ... 315-328
LUNT, HERBERT A.: The Response of Hybrid Poplar and Other Forest Tree Species to Fertilizer and Lime Treatment in Concrete Soil Frames ... 113-132
Lycopersicon esculentum, predisposition to fusarium wilt ... 165-184
Lymphomatosis in chicken embryos ... 217-238

Maple, sugar, response to fertilizers and lime in concrete frames ... 116-117, 119-120, 126-130
MAREK, JERRY W., TOTTINGHAM, W. E., NAGY, RUDOLPH, ROSS, A. FRANK, and CLAGETT, CARL O.: Blackening Indices of Potatoes Grown under Various Conditions of Field Culture ... 145-164
MCKAY, J. W.: Embryology of Pecan ... 263-283
MCLEAN, D. M.: Stamen Morphology in Flowers of the Muskmelon ... 49-54
Melampsora lini, reaction of flax to, inheritance ... 241-262
Mercuric phenyl cyanamide, effectiveness in red pine nurseries ... 89-91
MILLER, C. O., DAVIS, R. E., and LINDAHL, I. L.: Apparent Digestibility by Sheep of Lignin in Pea and Lima-Bean Vines ... 285-288
Morphology, stamen, in muskmelon flowers. D. M. McLean ... 49-54
Muskmelon flowers—
stamen—
arrangement ... 50-52
morphology. D. M. McLean ... 49-54
vascular continuity ... 52-54
MYERS, ALFRED T.: Seasonal Changes in Total and Soluble Oxalates in Leaf Blades and Petioles of Rhubarb ... 33-47

NAGY, RUDOLPH, TOTTINGHAM, W. E., ROSS, A. FRANK, MAREK, JERRY W., and CLAGETT, CARL O.: Blackening Indices of Potatoes Grown under Various Conditions of Field Culture ... 145-164
Nicotiana tabacum. *See* Tobacco.
NORTON, L. B., HANSBERRY, ROY, and CLAUSEN, ROBERT T.: Variations in the Chemical Composition and Insecticidal Properties of the Yam Bean (*Pachyrrhizus*) ... 55-64
Nutrient balance, effect on predisposition of tomatoes to fusarium wilt ... 176-179, 182

Oak, southern red, response to fertilizers and lime in concrete frames ... 116, 118-119, 126-130
Oxalates, total and soluble, in rhubarb leaf blades and petioles, seasonal changes. Alfred T. Myers ... 33-47
Oxalic acid in rhubarb tissue, analyses ... 35-44

Pachyrrhizus, chemical composition and insecticidal properties, variation. Roy Hansberry, Robert T. Clausen, and L. B. Norton ... 55-64
Parthenium argentatum. *See* Guayule.
Pea vines, lignin content, apparent digestibility by sheep. R. E. Davis, C. O. Miller, and I. L. Lindahl ... 285-288
Pecan—
embryology. J. W. McKay ... 263-283
fertilization, description ... 266
fruit—
cotyledons, growth ... 273-279
embryo growth or filling ... 271-273
endosperm development ... 267-271, 279-282
growth periods ... 266-282
pollination, description ... 264-266
trees—
composition, effect of indole-3-butyric acid ... 188-190, 191-192
growth, effect of indole-3-butyric acid ... 190-191
transplanted, effect of indole-3-butyric acid. C. L. Smith ... 187-192

Page

Pellicularia filamentosa—
basidiospores—
isolation and behavior ... 304-310
pathogenicity to sugarbeet ... 309-310
perfect stage of *Rhizoctonia solani* ... 310
Phaseolus vulgaris. *See* Bean; Beans.
Phenol—
content of turnip extracts, colorimetric tests ... 195-198
fractionation methods, effect on fungicidal activity of turnip ... 198-199
Phenolic fractions of crucifer roots, relation to clubroot. Frederick G. Smith, Karl Paul Link, and J. C. Walker ... 193-204
PHILLIPS, MAX, and WEIHE, H. D.: The Quantitative Estimation of Hemicelluloses by Direct Isolation ... 77-85
Photoperiodic behavior of Maryland Mammoth tobacco under localization treatments and in grafts with Connecticut Broadleaf. H. A. Allard ... 15-31
Pine, red—
response to fertilizers and lime in concrete frames ... 116, 117-118, 126-130
seedlings, damping-off, and winter injury, influence of chemical treatments. A. J. Riker, R. H. Gruenhagen, L. F. Roth, and W. H. Brener ... 87-95
Pinus resinosa. *See* Pine, red.
Plant tissue, oxalic acid in, analyses ... 35-44
Plasmodiophora brassicae—
relation to acidic and phenolic fractions of roots ... 193-203
toxicity of crucifers to ... 194-195
Pollination, pecan, description ... 264-266
POPE, O. A.: Effects of Skips, or Missing Row Segments, on Yield of Seed Cotton in Field Experiments ... 1-13
Poplar, hybrid—
growth and rooting, effects of fertilizer and lime ... 117, 124-126
response to fertilizer and lime treatment in concrete soil frames. Herbert A. Lunt ... 113-132
Potatoes—
blackening indices, relation to various conditions of field culture. W. E. Tottingham, Rudolph Nagy, A. Frank Ross, Jerry W. Marek, and Carl O. Clagett ... 145-164
inoculation with *Rhizoctonia solani* ... 293, 298-301
Pythium irregulare, cause of damping-off of pine seedlings ... 87

Range, revegetation by little bluestem ... 133-142
Revegetation by little bluestem, effect of seed source on growth, adaptation, and use. Donald R. Cornelius ... 133-143
Rheum spp. *See* Rhubarb.
Rhizoctonia foliage blight of sugar beets—
John E. Kotila ... 289-314
pathogen ... 301-310
symptoms and course ... 290-293
Rhizoctonia solani—
cause of damping-off of pine seedlings ... 87
description ... 301-312
pathogenicity to sugar beet ... 293-301
perfect stage, classification ... 312
Rhubarb—
leaf blades and petioles, oxalate content, seasonal changes. Alfred T. Myers ... 33-47
tissue, oxalic acid in, analyses ... 35-44
RIKER, A. J., GRUENHAGEN, R. H., ROTH, L. F., and BRENER, W. H.: Some Chemical Treatments and Their Influence on Damping-off, Weed Control, and Winter Injury of Red Pine Seedlings ... 87-95
Robinia spp. *See* Locust.
ROSS, A. FRANK, TOTTINGHAM, W. E., NAGY, RUDOLPH, MAREK, JERRY W., and CLAGETT, CARL O.: Blackening Indices of Potatoes Grown under Various Conditions of Field Culture ... 145-164

Rotenone in yam bean, toxicity tests ... 62-63
ROTH, L. F., RIKER, A. J., GRUENHAGEN, R. H., and BRENER, W. H.: Some Chemical Treatments and Their Influence on Damping-off, Weed Control, and Winter Injury of Red Pine Seedlings ... 87-95
Rust, flax, reaction to, inheritance. H. H. Flor ... 241-262
Ryegrass, inoculation with *Rhizoctonia solani* ... 293, 298-301

Seed coats, guayule, origin. Louis C. Erickson and H. M. Benedict ... 329-335
Seeds, hard, in beans, inheritance. G. A. Lebedeff ... 205-215
Sheep, digestion of lignin in pea and lima-bean vines. R. E. Davis, C. O. Miller, and I. L. Lindahl ... 285-288
Shipmast locust, growth, effect of site. Henry Hopp and Samuel Grober ... 315-328
Skips, effect on yield of seed cotton in field experiments. O. A. Pope ... 1-13
SMITH C. L.: Effect of Indole-3-Butyric Acid on transplanted Pecan Trees ... 187-192
SMITH, FREDERICK G., LINK, KARL PAUL, and WALKER, J. C.: Acidic and Phenolic Fractions of Crucifer Roots in Relation to Clubroot ... 193-204
Soil—
effect on growth of shipmast locust ... 317-320, 324, 326
frames, concrete, fertilizer and lime in, responses of hybrid poplar and other forest tree species. Herbert A. Lunt ... 113-132
moisture—
effect on predisposition of tomato to fusarium wilt ... 172
in irrigated and drought plots at Tucson, Ariz ... 102
temperature, effect on predisposition of tomato to fusarium wilt ... 167-170
Solanum tuberosum. *See* Potatoes.
Spruce—
Norway, response to fertilizers and lime in concrete frames ... 116-117, 122, 126-130
white, response to fertilizers and lime in concrete frames ... 116-117, 123-124, 126-130
Stamen morphology, muskmelon flowers. D. M. McLean ... 49-54
Straw—
hemicelluloses—
extraction ... 82-84
quantitative estimation ... 78-85
holocellulose isolation ... 81
Sugar beets—
infection by basidiospores of foliage blight fungus ... 305-312
leaves, petioles, and crowns, inoculation with *Rhizoctonia solani* ... 294-295
rhizoctonia foliage blight—
John E. Kotila ... 289-314
pathogen ... 301-310
symptoms and course ... 290-293
roots, inoculation with *Rhizoctonia solani* ... 296-298
seedlings, inoculation with *Rhizoctonia solani* ... 295-296

Tetramethyl thiuramdisulfide, effectiveness in red pine nurseries ... 89, 92-94
Tobacco—
Connecticut Broadleaf, grafts of Maryland Mammoth with, photoperiodic behavior. H. A. Allard ... 15-31
Maryland Mammoth, photoperiodic behavior under localization treatments and in grafts with Connecticut Broadleaf. H. A. Allard ... 15-31
photoperiodic response ... 15-30
Tomato, predisposition to fusarium wilt. R. E. Foster and J. C. Walker ... 165-185
